

COLOR ENHANCEMENT & TEXTURE SERVICES

FYI

A color enhancement or texture service is an investment in your appearance. To ensure that you are completely pleased with your investment, please observe these recommendations.

MULTIPLE SERVICES

If enhancing your hair with both a color and texture service, it's important to discuss with your stylist which service should be performed first.

CLEANSING AND STYLING TIPS

- Wait to shampoo hair 24 hours after a color service.
- Wait to shampoo hair 48 hours after a texture service.
- Avoid deep penetrating conditioners for the first 10 days.
- Use professional products with tepid water.
- Avoid pulling or stretching the hair when it is wet.
- Lower the temperatures on drying and styling appliances.

HAIR PERILS

Sun exposure, tanning beds, chlorinated pools, hot tubs, and saunas can lead to deterioration of your texture and/or color enhanced hair service. If not avoided fading, curl relaxation and dryness can become common challenges.

TREATMENTS

Regular clarifying treatments can help to maintain the performance of your texture and/or color treated hair service by removing harmful mineral deposits. This treatment is recommended every 4-8 weeks.

You are strongly urged to use a professional hair care regimen. Professional products extend the life of your color and/or texture service by maintaining the hair's moisture and strength, and many protect hair from ultra violet rays and thermal damage.
